-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 19 February 2002.
2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
3) ☒ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

6) ☐ Other: _____.

DETAILED ACTION

Drawings

1. Figures 12 and 13 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: on page 7, line 23, "input/output unit" should be "input/output unit 20"; on page 9, line 1, "121-3" should be "121-13". Appropriate correction is required.

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

4. Claims 4-6 are objected to because of the following informalities: in claim 4, line 13, "the second unit" should be "a second unit", and line 14, "a second unit" should be "the second unit". Wherein claims 5-6 are depended upon claim 4. Appropriate correction is required.

Allowable Subject Matter

5. Claims 1-3 and 7-8 are allowed.
6. Claims 4-6 would be allowable if rewritten or amended to overcome the objections set forth in this Office action.
7. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to show or suggest that a method or apparatus for controlling serial data communication among a plurality of units including the detection of detecting a state transition of a state control signal in a transmission circuit to find a time difference between an occurrence time of the state transition and a sending time of transition state information corresponding to the transition state to send the transition state information and delay time information on the time difference to a reception circuit in order to regenerate the state control signal at the time when a given delay time has elapsed from the occurrence time of the state transition based on the delay time information.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Leger (U.S. Patent No. 5,446,765) discloses a communication system for encoding and decoding digital signals in serial data communication and performing clock recovery from the serial data signal and DC offset compensation within the serial signals.

9. This application is in condition for allowance except for the following formal matters:

The objections of Figures 12 and 13, the specification and claims 4-6 discussed above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
